A method based on the preparation of mixtures com-  
 posed of aromatic extracts under examination with  
 saturated oil (non-aromatic) of known structural com-  
 position, having a molecular weight of the same order,  
 is proposed for the determination of the structural  
 composition of aromatic extracts derived from the  
 residues of lubricating oils, whose high content of C<sub>10</sub>A  
 compounds, usually, does not permit the direct appli-  
 cation of the equations and nomographs pertinent to  
 fractions of normal petroleum. The physical prop-  
 erties are determined and the structural composition
